ONTARIO'S RED LAKE DISTRICT

One of the world's most prolific gold producing regions with historic production of 28 million ozs Au from 28 mines.

An excellent network of access roads allows for exploration work in the winter months at Great Bear's Dixie Lake and recently acquired West Madsen projects.

DIXIE LAKE PROJECT

- GBR holds 100% of 7,106 hectares of prospective greenstone belts at Dixie Lake with no royalties
- Adjacent to historical Madsen and Starratt Olsen mines, Dixie Lake is mineralized through 1.7 km of strike
- 2017 hole DL-005 is the widest – highest grade intercept on the property to date with 10.4 m of 16.84 g/t Au

GBR DRILLING

2017: 1,000 metres followed up on 160+ historic holes, with high-grade intercepts

Q1 2018: 3,000 metre drill program planned (15-20 holes), focused on extending strike length and testing structures

WEST MADSEN PROJECT

West Madsen (100%) is an on-strike extension of Pure Gold's high-grade Madsen project.

Recent eastern expansion of Block A of 725 hectares; 2,725 hectares for all of West Madsen.

PGM's Wedge Zone (adjacent to GBR's West Madsen Block 'A')

- 33.3 g/t gold over 8.3m
- 21.3 g/t gold over 10.3m
- 22.5g/t gold over 2.0m
- 15.1 g/t gold over 5.4m

Other PGM Zones

- 28.2 g/t gold over 7m
- 26.4 g/t gold over 12.7m
- 27.1 g/t gold over 5.8m

Geophysical survey shows two primary gold targets:

- 1) A prominent northeast to southwest magnetic linear
- 2) Strong evidence of large-scale folding

PLANS FOR 2018 AT WEST MADSEN

- Geological mapping, rock sampling
- Prospecting
- Drill target generation
